

# CHIRIMEN

## Make Real Things with Browser Technologies

CHIRIMEN is designed for Web developers to MAKE real things that are connected to the Web via Browser technologies.

## Easy Way to Make

GPIO/I2C WebAPIs (to control devices) are introduced into polyfill by CHIRIMEN team. Web developers need NOT change their own ordinary development style.

**Open  
Source**

## Open and Neutral

Developers can get manufacturing process, API spec, and all necessary sources from the following URL.

This community honors developer's will and work on the standeardization.

## Powerd by

Raspberry Pi Zero W
