CHIRIMEN

Make Real Things with Browser Technologies

CHIRIMEN is designed for Web developers to MAKE real things that are connected to the Web via Browser technologies.

Easy Way to Make

GPIO/I2C WebAPIs (to control devices) are introduced into polyfill by CHIRIMEN team. Web developers need NOT change their own ordinary development style.

Open and Neutral

Open Source

Developers can get manufacturing process, API spec, and all necessary sources from the following URL.
This community honors developer's will and work on the standeardization.

Powerd by

Raspberry Pi Zero W
